

## 21 COBRA CPP 8000

It's a jump-starter that fits in your handbag. But despite its chocolate-bar proportions (just 1.7cm thick), it has enough juice to start almost any engine, even if the battery is completely dead, and can also boost your phone. All you need now is a handbag. £79.99; [cobraelectronics.co.uk](http://cobraelectronics.co.uk)
